

The **Model 55** Foil Stamping Machines are precision designed, using top grade materials. This provides a long life under the constant pounding of today's production needs. This machine can be adapted by the manufacturer to print trade marks, ad slogans, etc.

The Model 55 is an excellent choice for foil stamping individual names, monograms, fraternal emblems, 3 and 4 line ads, etc. These exclusive Kwikprint features make this machine the logical choice: The tiltable typeholder makes it unnecessary to remove when loading or unloading type. The 3-temperature electric unit supplies the correct temperature for perfect stamping every time. Two working platforms; a large sliding unit, provided with plastic lineboard graduated to 1/4" squares assuring perfect alignment. Lower platform enabling correct imprinting of articles that cannot be stamped flat, such as golf bags, small overnight bags, etc.

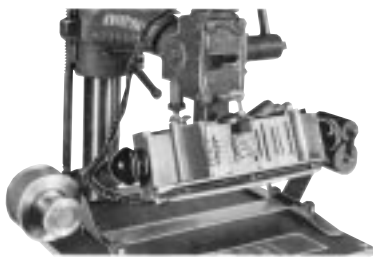

**Additional Attachments**

**Multiline Typeholder.** Identical in construction with our standard 1" & 2" Typeholders. It has a series of staggered screws in each jaw that holds individual lines of type in place. This eliminates the tedious job of "building" up each line during multiline stamping.

**Two Way Platform.** This piece of optional equipment is extremely handy, especially during the alignment phase of your stamping operation. Once the item to be stamped has been "registered" and secured to the platform, the alignment can then be adjusted by moving the entire platform in or out (standard) and left and right. This eliminates any adjustment or movement of the item itself.

**Other Attachments.** Precision Linefinder. Machine Light. Right Angle Platform Gauges. Pencil Attachment. Match Attachment. Custom Fixtures Available.

**Specifications.** Height 22" - Width 12" - Depth 16". Large platform 12" x 12". Lower platform 3 7/8" x 7 3/8". Stroke to top platform (type to platform) 1 3/4". By moving top platform, stroke to lower platform 2 1/4". Depth of throat (distance from type impression to back column) 8 1/2". Length of type line 5 3/4". Will stamp up to 72 point or 1" type. Weight, approximately 50 lbs. - Crated 65 lbs.

**Tiltable Typeholders Options.**

(Multiline Feature Additional)

- #7 - 1" x 5 3/4"
- #80 - 2" x 5 3/4"
- #79 - 1" x 9"
- #809 - 2" x 9"
- #305 - 3" x 5 3/4"

**Automatic Heat Control**

This standard feature will give "in between" heats not found with the regular 3-way switch. Particularly useful to plastic stampers. Available on all models. Also available in 220 volt model.

**Automatic Roll Feed Attachment**

Will handle foil up to one or two inches wide. The feed can be quickly adjusted to put a required length of foil up to 9" long, depending on which size selected. Increases your output and reduces your foil wastage to a minimum.
