

Micro-Percussion Mobile Marker

*For the identification and traceability of parts
which are large, heavy or in areas difficult to reach.*

The Pro-Pen M3000 uses micro-percussion technology which is based on indenting the material with an oscillating stylus. The M3000 can mark on metals up to a hardness of 60 Rockwell C, plastics, woods, etc. The machine does not require a PC ... it is equipped with a screen, keyboard and easy-to-use integrated software ... making it totally independent. The M3000 comes supplied with a Ni-CD battery pack ... ready for use immediately. It's ergonomic design makes the M3000 suitable for left or right-handed operators. The M3000 allows horizontal or vertical marking. It can mark cast or machined surfaces ... flat, concave, convex or circular.

*Mark: Logos, Numbers, Date, Time
Linear, angular or circular
Inverted, mirrored or reflected
Centered, compressed, italic*
